PROFESSIONAL SUMMARY

Experienced Software Engineer with 5+ years of expertise in backend development, cloud architecture, and DevOps. Proven track record of leading technical teams, migrating legacy systems to modern microservices architectures, and delivering scalable solutions using AWS, Node.js, and modern DevOps practices. Skilled in full-stack development with strong experience in API design, database optimization, and CI/CD implementation.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Bash, SQL

Backend Frameworks: Node.js, NestJS, Express.js

Frontend Technologies: React.js, Redux, Flutter

Cloud & DevOps: AWS (ECS, Fargate, EC2, ALB, Route 53, SNS, CDN), Google Cloud, Docker, Terraform, GitHub Actions, Fastlane

Databases: PostgreSQL, MySQL, Firebase, Redis

Development Tools: Git, CI/CD, RESTful APIs, Microservices Architecture, JWT Authentication

PROFESSIONAL EXPERIENCE

Software Engineer - Fullstack

Sample Assist

October 2023 – Present

Wollongong, NSW, Australia

- Led migration of serverless Firebase system to production-ready microservices architecture on AWS, achieving 200% performance improvement and resolving critical security vulnerabilities within 6 months
- Architected and provisioned AWS infrastructure using Terraform, managing ECS, Fargate, ALB, Redis, and Route 53 for automated, scalable deployments
- Designed and implemented JWT-based authentication service with two-factor authentication (2FA), significantly enhancing system security and user access control
- Established CI/CD pipeline using GitHub Actions and Fastlane for automated build and deployment of two Flutter mobile applications to Apple App Store
- Migrated and redesigned 100+ SQL tables from Firebase to PostgreSQL, improving scalability and data management capabilities
- Developed and containerized 15+ microservices using Docker, ensuring efficient and reliable AWS deployments
- Redesigned RESTful APIs for two mobile applications and one web platform, enhancing performance, security, and maintainability
- Created standardized NestJS project templates for backend services, establishing consistent development framework across team
- Conducted comprehensive code reviews and provided technical consultancy to stakeholders on optimal tech stack selection

Software Engineer - Backend Developer

GGJungle VN Co., Ltd

March 2022 – June 2023

Ho Chi Minh City, Vietnam

- Developed and maintained RESTful APIs using Node.js and NestJS, ensuring seamless integration and continuous system improvements
- Engineered coupon feature that drove 20% increase in sales post-release, demonstrating direct business impact
- Integrated VNPAY e-payment solution into existing credit payment systems, enhancing payment reliability and customer experience
- Implemented monorepo strategy to centralize source code, improving version control and code sharing across development teams
- Led technical meetings with Japanese clients, effectively communicating complex technical requirements and ensuring project alignment
- Optimized legacy MySQL databases, improving data integrity and performance while establishing disaster recovery protocols
- Leveraged AWS services (EC2, CDN, SNS) to optimize cloud operations and enhance system efficiency
- Customized Docker configurations for AWS deployments, improving application scalability and reducing deployment time

Software Engineer

FPT Tan Thuan Telecom Co., Ltd

April 2021 – February 2022

Ho Chi Minh City, Vietnam

- Integrated TikTok RESTful APIs and Google Voice Recognition API for CAPTCHA solutions, expanding platform capabilities
- Engineered robust RESTful APIs from scratch using Node.js, integrating Redux for enhanced application state management
- Developed browser extensions to extend functionality of web applications, improving user productivity
- Designed and built comprehensive sales team tools using React.js, Node.js, and Redux

EDUCATION

University of Wollongong

Master of Computer Science

Wollongong, NSW, Australia

July 2023 – Jul 2025

Vietnam National University - UIT

Bachelor of Science in Computer Science

Ho Chi Minh City, Vietnam

September 2016 – September 2020

KEY ACHIEVEMENTS

- Successfully led team migration from Firebase to AWS microservices, delivering 200% performance improvement
- Designed and implemented enterprise-grade authentication system with 2FA capabilities
- Developed high-impact coupon feature resulting in 20% sales increase
- Established comprehensive CI/CD pipelines and DevOps practices across multiple organizations
